Introduction

Special FLibMath module provides the library of standard mathematical functions into the system.

For addressing to the functions of the library you must use the path: <Special.FLibMath.*>. Where '*' – function's identifier in the library.

1. Functions

Table 1 provides a description of each function of the library. For each function the evaluation time of execution is measured. The measurement was made on a system with the following parameters: Athlon 64 3000 + (ALTLinux 3.0 (32bit)), by measuring the total time of execution of the function, while calling it 1000 times.

Table 1: The functions of the library of standard mathematical functions
